

New machine with rotating head

400-360-10060

- Pattern machine extra large working area 1000x600cm, long arm for precision stitching in series
- Rotating head for uniform sewing in every production field.
- Pneumatic lifting and lowering of the head
- Rotative hook, double capacity
- Max. sewing speed 2.500 rpm
- The large pattern allows the use of the same template for different kind of work simultaneously. (Example Purses front and back).
- The machine is equipped with Touch-screen panel for managing and programming templates on-board. (Ex Purses Front and back)
- Unlimited head rotation
- Foldable table and section, for easy transportation of the machine
- Long lasting reliability

Presser Foot

The height and pressure of the special presser foot is controlled from the touch screen and its use guarantees uniform pressure with multi-layer fabric.

Control Panel

Touch screen control panel easy and intuitive to use. It is possible to create patterns on the panel.

Special Rotating Head

The special rotative head with **pneumatic lifter**, was projected to ensure the same stitch quality in every sewing direction. Particularly suitable for production that requires even stitching. The rotating block is equipped with cone thread holder and thread break sensor. The machine is equipped with a special cover on the working plate which allows the quick and easy replacement of the bobbin.

Head	Lockstich rotative head
Hook	Rotative double capacity
Speed	Max sewing speed 2.500 rpm
Sewing Pattern	Max 100mm x 600mm
Trasport mechanism	By encoder motors
Stich length	From 0,05mm to 12,7mm
Max Stiches per program	40.000 Stiches
Program loading	Via USB
Number of storable programs	200
Foot lift	65mm
Thread cutter	Included - standard
Motor	AC Servo 750w Direct drive
Consumption Stand-by/Working	200W/400w
Weight	350Kg without case
Voltage	Single Phase
Air pressure	0,5 MPA 1,8/L/min
