ADVANCED LOCKSTITCH

Sealed Oil Pan

Thanks to the sealed oil pan and the semi-dry head, the oil never comes out avoiding to dirty the fabric and the lubrication remains excellent.

Short Thread

The remaining thread after the thread trimmer at the end of the seam is short: it is therefore not necessary to cut the remaining thread, saving time and costs.

Operative Panel

Latest generation, integrated, easy and intuitive panel from which it is possible to control all the programmed sewing functions.
