

EFFECI

ESP810-E IRONING PRESS

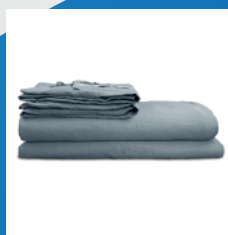

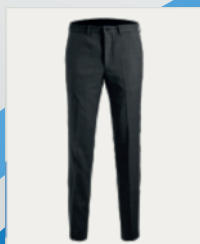

Caratteristiche

Electronic steam press with digital panel that allows temperature control according to the type of cloth. The steam jet button is located on the sides of the handle. The non-stick Teflon surface is about 10 times wider than most irons. Large easy-to-fill water tank. Closing knob to make transport safe.

- Nebulizer dispenser
- Filling container
- Press cushion
- Stand (Optional)

ESP810-E

IRONING PRESS

Panel

The Effeci ironing press allows you to adapt the temperature to 4 different types of material. The alarm function alerts you when the press arm has been lowered for too long to avoid burning the garment.

Jet of steam

There is a water tank which, by means of two red buttons incorporated on the side of the handle, activates the instant steam jet.

Stand

As an option, a foldable support with side support is available for items that need to be ironed. There is also a press opening lock function for safety that can be used during transport.
