## DOUBLE PRESS

### Auto

There are 2 modes: MANUAL by pressing the green button the press goes down  
AUTOMATIC the press goes down automatically when one of the two working ends is reached.

There is also the safety button and the pressure gauge with its knob to adjust the pressure.

### Double LCD Display

The temperature is adjustable and is displayed on the LCD display, it can reach 200 °. There is also a second display for digital adjustment of the time after which the press is raised so as not to burn or ruin the fabric.

### Materials

The press is able to weld logos on materials of different types and thicknesses such as t-shirts, sports fabrics, padded and more in a few seconds simply by setting the appropriate time and temperature.
