7724 E2

OVERLOCK

Simple Panel

The machine has a very simple but complete panel: speed up to 7000rpm, LED light, needle position and slow start with a click!

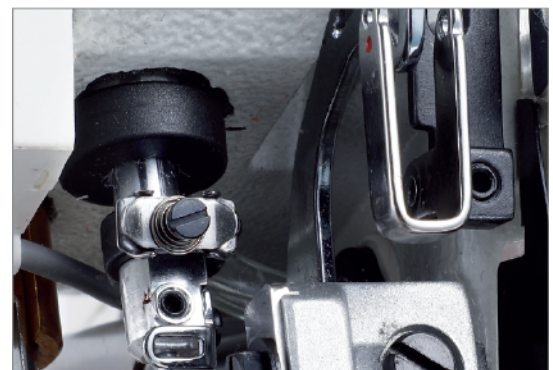

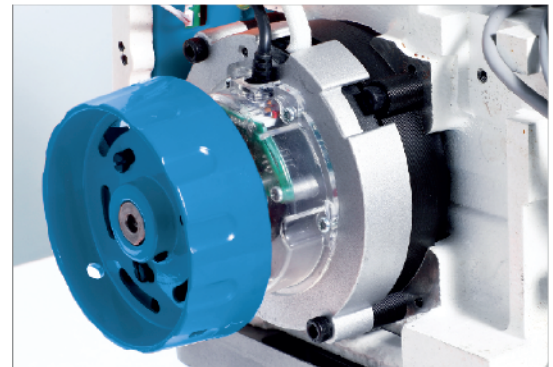

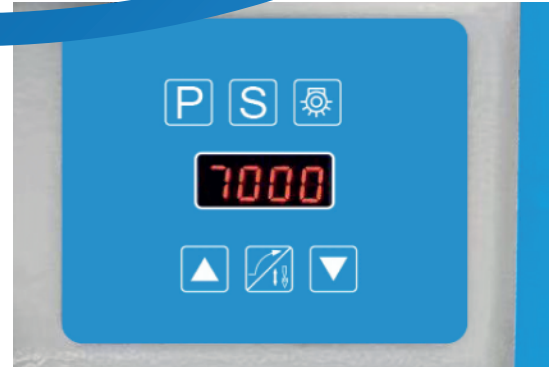

Direct Drive Motor

The high performance motor allows you to reach up to 7000 rpm with a super rapid acceleration and deceleration response. It also has all the advantages of an integrated servo motor: low energy consumption, reduced vibrations and maximum silence.

Integrated Oil System

Don't worry about the oil. Thanks to the needle bar with integrated oil system there will be no leaks and the seams and garments will always be clean.
