TOP FEED
FOR LIGHT MATERIAL

Touch Screen

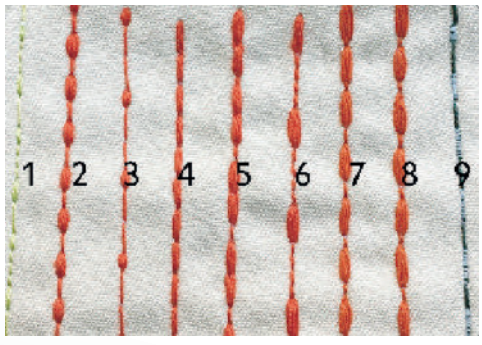
Thanks to the 3 stepper motors, everything can be controlled from the touch screen panel: the height of the presser foot, the thread cut, the bartack, the stitch length, the differential.
The knee lifter is also electronic.

Top Feed

Suitable for light fabrics, the topfeed allows you to align those fabrics that slip and pair them perfectly. Or it allows you to gather.

Stitch Patterns

You can select or create sewing patterns that allow you to make ornamental stitches by alternating and repeating the straight stitch.



Specs

Model	1949X
Needle	(DB×1)#7~#16
Stitch Lenght	5mm
Footlifter Height	6-12mm
Max Speed	4500
Volume	620x290x555
Weight	45.8/39.7
