

EFFECI

AVG WRAPPING MACHINE

Description

Fully automatic wrapping machine of shank buttons. Press the pedal and the machine will start the rotating cone that will wrap any type of shank button seam, adapting itself without having to choose the program.

SELECTOR

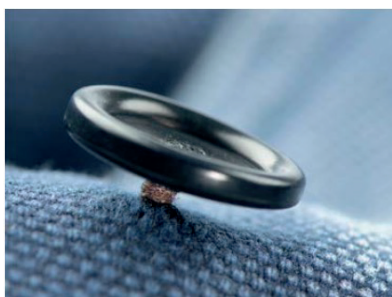

Thanks to the selector, it is possible to choose the number of turns around the shank.

In addition, there is also a green LED indicator that will warn you when the machine is at temperature.

HOT CUT

No tearing but hot cutting, designed to lock the shank, compatible with all commercially available hot melt threads, even non-original third-party ones.

Safety switch and timing management via PLC.
