DOUBLE PNEUMATIC 40-2 TRANSFER PRESS

Description

Pneumatic double transfer 40x40cm heat press (max 6 bar) capable of reaching temperatures up to 300°C, featuring an LCD display for digital time and temperature control. Equipped with a pressure gauge and safety button. Suitable for low-temperature bonding of heat-seal adhesives and fabrics in garment manufacturing; it heat-transfers colored designs and text (using sublimation or solvent-based inks) onto cotton, linen, synthetic fibers, etc. It also handles thermal processes such as flock transfer (velvet effect) and raised printing (foam effect).

FEATURES

- Dual pneumatic platen
- LCD display
- Time adjustment
- Temperature adjustment
- Sturdy handle
- 2.2 kW power (220V)
- Safety button
- Max temperature 300°C
- Pressure gauge
